Current Release

Version 1.0 – June 2022

Required Integriti Version License

Integriti Pro/Infiniti v22 license

Minimum Installed Integriti Version

Integriti Pro/Infiniti v22.1 or higher

Licensing Requirements

Integriti Dormakaba integrations require the “Third Party Door Integration” license (part number 996941), with a count for each Door that will be synchronised to B-COMM.

Tested Against

- dormakaba B-COMM v2.5.1

Features

- **Entity Synchronisation:**
 - Dormakaba Doors and Controllers can be created in Integriti to create and configure Actuators and Keyplans in B-COMM.
 - Users can be given permission to Dormakaba Doors and have a single Card synchronised to B-COMM to be able to access permitted Doors.
 - Import functionality is available to use against an existing B-COMM installation to begin managing it from Integriti.
 - Note: This is recommended for initial setup only, not for on-going maintenance/synchronisation.
- **Event Logging:**
 - Events and Alarms from Dormakaba will appear in Integriti Review to be leveraged for reporting and alarm management.
- **Door Control and Monitoring:**
 - The state of Dormakaba Doors will be reflected from events received from B-COMM
 - Note: The amount of state reported to Integriti will depend on the Actuators used/programmed in B-COMM
 - Doors in B-COMM synchronised from Integriti can have commands called on them via Integriti to control them directly.
